Art Unit: 1625

This application contains claims directed to patentably distinct species of the claimed invention.

Applicants are required under 35 U.S.C. 121 to elect a single disclosed specie for prosecution on the merits to which the claims shall be restricted if not generic claim is finally held to be allowable

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a generic claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all of the limitations of an allowed generic claim as provided by 37CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species, MPEP 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the Examiner finds one of the inventions unpatentable over the prior art, the evidence may be used in a rejection under 35 USC 103 of the other inventions.

To be complete applicants response must include a provisional election even though the requirement is traversed.
